

**DEEP NATURAL CLEAN**  
It doesn't get more natural than just water. Clean to a level you've never seen or reached before with nothing but water bubbles. This may sound impossible, but these are innovative Thera-Clean Microbubbles that can do something that other systems out there simply can't do.

**REDUCES ODOR**  
Most bad odors that come from pets are a sign of skin issues deep down within the pores and hair follicles. The Advanced Skin Health System by Thera-Clean now makes it possible to clean out all the irritants that cause bad odor. Veterinarians and grooming salon owners, almost universally, mention on the improvement of skin odor following just one bath. This feature alone often provides the incentive for pet owners to continue protracted therapies. Have you ever been able to get a skunk sprayed dog back to smelling normal in just one bath? We have.

**REDUCES ITCHING**  
Itchy skin has an almost immediate response to one bath and certainly after two or three baths. Constant itching & biting can lead to increased problems. With clean and healthier skin, the itching and biting diminishes and so does the risk of a secondary infection.

**REDUCES SHEDDING**  
The cleaner the skin and hair, the healthier it is. Healthy hair is stronger hair, in turn, holding onto the skin for that much longer. It's a cycle that all starts with the skin.

**ENVIRONMENTLY FRIENDLY**  
The future of our planet is extremely important. A Thera-Clean Microbubble bath uses no chemicals what-so-ever. If needed, only natural plant based enzymes are used to assist the Thera-Clean Microbubbles lifting the debris up from the animal's skin and pores.

**REDUCES STRESS & ANXIETY**  
Daily stress and anxiety for a pet can be harmful. A Thera-Clean Microbubble bath relaxes both dogs and cats to a level similar to a deep tissue massage. The pet falls into such a relaxed state, it's actually difficult to get them to come out of the water.

**COMPLETELY HYPO-ALLERGENIC**  
It is literally impossible to have an allergic reaction to a Thera-Clean Microbubble bath. Why? Because it's just water and bubbles.

**NO ADDITIONAL SKIN IRRITATION**  
The process does not require direct contact with already sensitive skin (aside from warm bubble infused water). There are no detergents or chemicals involved and no risk of additional reactions.

**IMPROVES THERAPEUTIC RESULTS**  
Whether it's medicated shampoos or cortisone steroids, the Thera-Clean Microbubble bath does all the hard work and clear everything out of the skin that's been causing skin issues so these types of products can now do their job and get results. While many veterinarians are reluctant to suggest that micro-bubble baths are directly responsible for treatment results, they are all willing to volunteer that they believe it enhances the efficiency of conventional medications.

**ATOPY/DEEP SECONDARY PYODERMAS**  
*Furry Paws Grooming Salon Enterprise AL, USA*

One bath a week for five weeks. Notice new hair growth along with skin pigment back to its original healthy state. (Dog has now made a full recovery.)

**HAIR FOLLICLE**  
Microscopic view of hair follicle before and after a Thera-Clean Microbubble bath. The left hand side is clogged with oil and debris. On the right hand side the Thera-Clean Microbubbles have opened up the hair follicle to allow the pore to breathe and clear a path for topical medications.

**What is the Thera-Clean difference?**

Thera-Clean Microbubbles work on a much deeper level than any soaps or shampoos. They offer a whole new concept of clean skin. This means the Thera-Clean Microbubble bath will enhance the efficiency of any other form of "treatment". Any medication whether administered in the form of a shampoo or orally will function much better due to improved pore and hair follicle condition.

A Thera-Clean Microbubble bath reduces odor, reduces itching, insures no additional skin irritation and improves results of other skin therapies your groomer or veterinarian may be recommending.

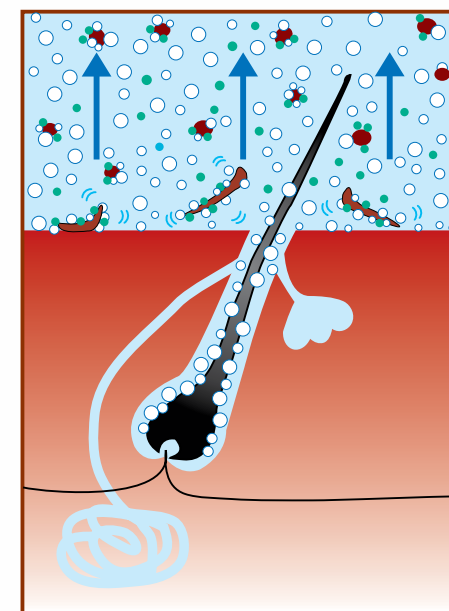

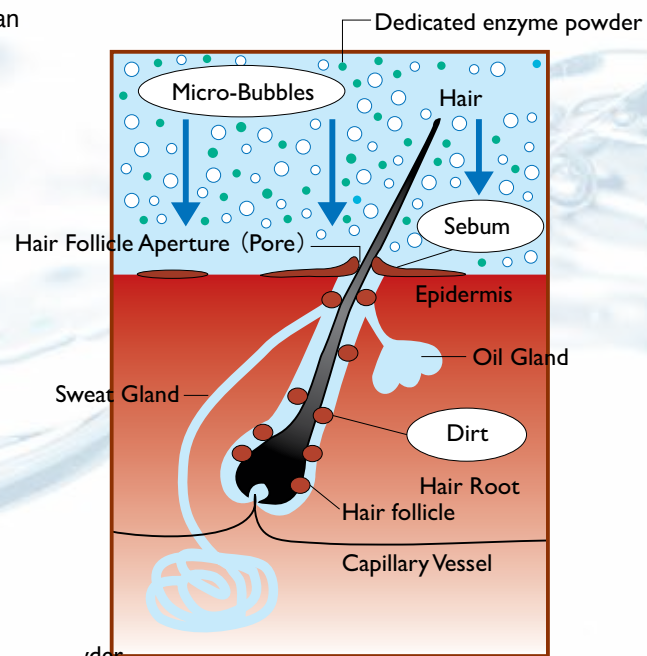

**How will my pet respond to the Thera-Clean Microbubble bath?**

Thera-Clean Microbubbles are gentle on your pet and an enjoyable experience for them. Did you know that pets also have a lot of stress just like you and I by living in a variety of environments? The Thera-Clean Microbubble bath will ease the stress by negative ionized air and a synergy effect of the all natural plant enzyme. A Thera-Clean Microbubble bath is perfectly safe and can be used daily if necessary.

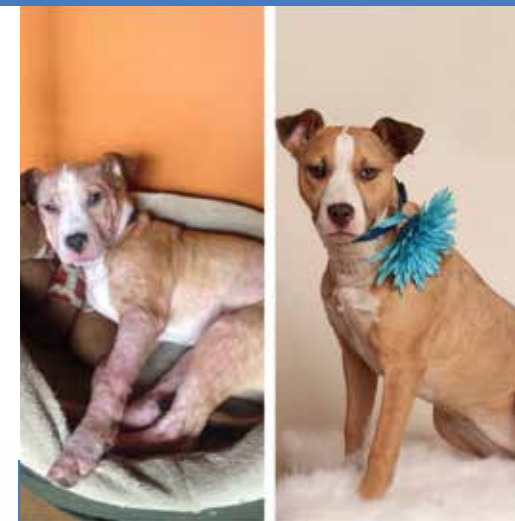

**How Do Thera-Clean Microbubbles Work?**

The size of a pore is (30µ m = 30/1,000mm) and the size of a Thera-Clean Microbubble is (20µ m = 20/1,000mm). The Thera-Clean Microbubbles are just water and air. Oil and water repel so the alone will not remove the sebum crust on its own. The Toji enzyme powder will eat away at the sebum crust breaking it down and making it softer, in turn the broken-down sebum will be removed by the Thera-Clean Microbubbles. After the sebum is removed, then the Thera-Clean Microbubbles travel deep into the pore where it will clean out the pore completely.

**YEAST OVERGROWTH**  
*Pawsitive Karma / Castro Valley, CA, USA*  
After just one bath. Less itch, new hair growth.

**NEW REVENUE STREAM FOR YOUR BUSINESS**  
prices seen here are examples only.

**DEMODOX MANGE**  
*Floss' Grooming / Somerdale, NJ, USA*  
One bath a week for four weeks. Mange brought under control to clean healthy skin.

**Skin "Debridment" on a Micro-Level**

We know we need to flush an abscess before it can heal and it would appear we need to deep clean many chronic skin conditions before they can heal. Thera-Clean Microbubbles makes that possible.

Japanese groomers and veterinarians have had the advantage of this technology for the past 12 years. They correctly concluded that bacteria could be protected deep in hair follicles and that deep cleaning could be the answer. Their results suggests they are right...truly clean skin is "Very Important". In speaking with many of the groomers and veterinarians who have more experience with using the technology, there is a growing belief that Thera-Clean Microbubbles may also aid in removing contact allergens that are imbedded in the dermis and use in chronic allergy cases is now as common as for chronic pyoderma.

The concept is understandable, familiar and safe; There are no risks involved. The whole process involves only plant and mineral based enzymes along with scientifically generated "micro" bubbles of air.

Thera-Clean Microbubble cleansing technology is based on science and the applications are based on existing awareness. To clean and debride is common medical practice; it only makes sense to expand on the process now that the capability to do so exists.

## Thera-Clean Big Splash Marketing Support Packaged with EVERY SYSTEM! (first 3 months)

Get free content and marketing support to grow your Thera-Clean business!  
Purchase a system and get the Big Splash full-marketing support to help promote and share the benefits of Thera-Clean in your community.

### YOUR BIG SPLASH MARKETING LAUNCH KIT INCLUDES:

**WEBSITE COPY:** We will send you articles, pictures, videos and more with 4 main goals; educate, persuade, entertain, and convert.

Effective website copy is vital for any business that wish to expand their reach. It engages readers, provides them with the information they seek and need as well as many times converting them to your new service.

-  Before and after case studies
-  Customizable News Articles / Press Releases
-  Customized, print-ready Flyers and Brochures
-  Social Media content ready-to-post content for Facebook, Twitter, Instagram etc...

**VIDEO CONTENT:** We have multiple videos that show the process we can send and share with you to show your clients.

**PROVEN PRICING PACKAGE STRATEGIES** to open up a whole new revenue stream!

### Big Splash Ongoing Support

It doesn't stop with the launch. Each month Thera-Clean will host a Pet Salon Marketing Mastermind on our private FaceBook page open only to our Thera-Clean owners, where you will have a chance to hear from some of the most successful salon owners world-wide. You will get tips and ideas to grow your business, get marketing ideas, pricing strategies, networking ideas as well as news on new Thera-Clean products and tips on offering them to your clients. This is also a great place to find proven strategies on utilizing your Thera-Clean Microbubble system to get animal skin better and faster by speaking with owners of the system who have found what works best.

*"The Thera-Clean Microbubble machine and company has exceeded our expectations. The machine and Thera-Clean products are paving a new path in the grooming world.
